

MANAGING COVID-19 SAFELY

Leveraging technology to keep homeowners and employees safe while we protect your home.

1

Training & Awareness

To ensure the safety of our workers and homeowners, Integrity Roofing & Siding has researched and follows all requirements provided by government agencies, including the Centers for Disease Control & Prevention (www.cdc.gov). These are standards that we share and train our staff on daily.

2

Personal Protective Equipment (PPE)

Even before safety was cool (because it is, right?), Integrity Roofing & Siding's was investing in protecting our employees and all people surrounded by our business. Today PPE for our team includes hand sanitizer, Lysol wipes for our vehicles and an internal health plan to ensure workers on the job are feeling healthy 100% at all times.

3

Technology

Integrity Roofing & Siding is a leader in utilizing technology for safety and efficiency in the roofing industry. From satellite measurements to professional inspection reports, technology allows us to give you better information on your home, fast.

4

Virtual Consultations

As a business, we always prefer to meet customers face-to-face before we are trusted with protecting their home. Our virtual consultation options allow us to maintain the highest level of communication as we walk you through photos from our detailed inspection and share your product options in caring for your home.

"As a business, our first commitment is to safety. Safety for our employees and the homeowners that trust us to care for their homes. As President of Integrity Roofing & Siding, I can always be reached to speak with you directly about our safety program and best practices."

- Ronald Suarez (ronald@integritysa.com)
